

**My name is Edial  
Dekker, I do**

**Hack de Overheid**

# Hack de Overheid.

- Started in 2009
- More than 50 apps developed
- Growing every event (a lot)
- Media loves it.
- Working on full-time team

# Our inspiration: Rewired State

‘Coding a better country’

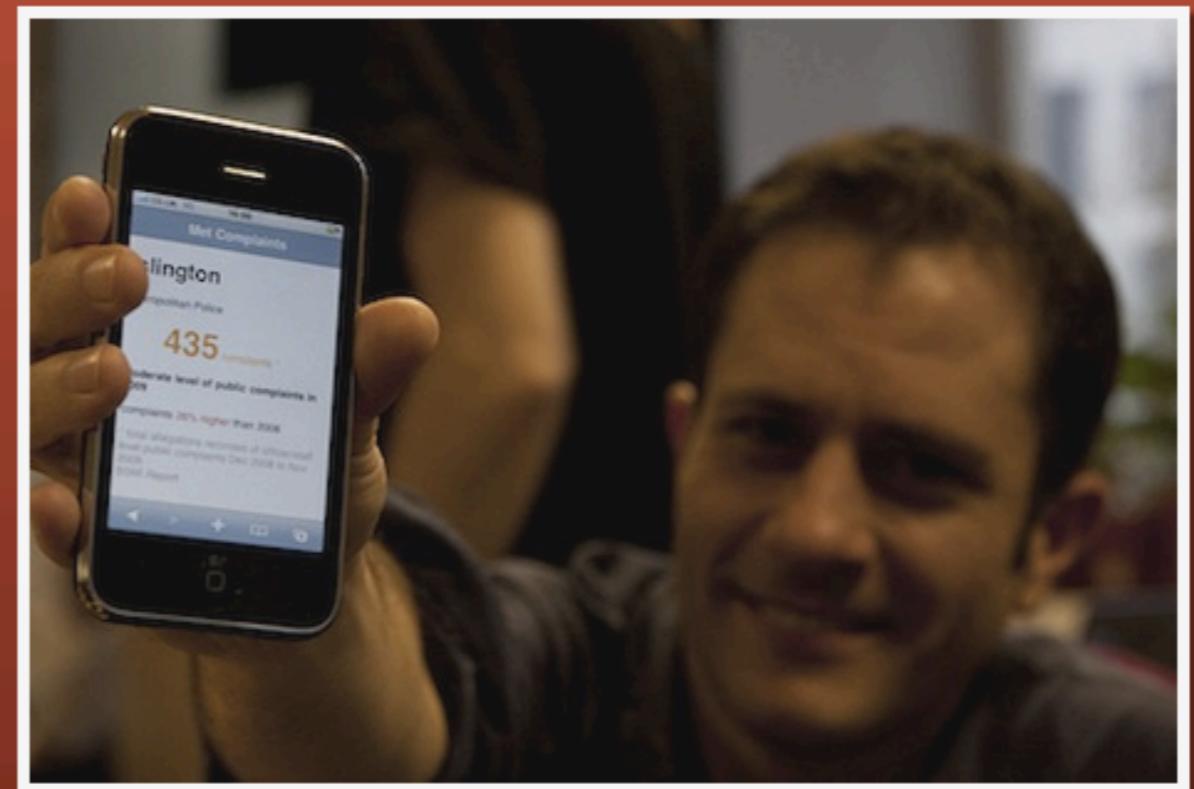

## REWIRED STATE

Coding a Better Country

We run hack days.

We take between 10 – 150 talented developers and give them money, time, space, caffeine, sugar and food, whilst they build cool/creative prototypes to solve your problems.

If you'd like to kickstart a new project or accelerate an existing Research & Development programme, get in touch.

Our strategy:

**Don't ask for  
permission, but ask  
for forgiveness later.**

# Hack de Overheid

- Being sexy is important for everyone
- We help the participants move on
- It's okay to ask money from the government when we get stuff done
- Being abused, could be positive.

# The next steps

## Hack de Overheid

- More collaborations
- Lobby for ambassadors
- Full-time team
- Go international

# Gidsy

We're building a marketplace for authentic experiences. Curious?
